

THIANCHAI CHAMNAN

Software Developer

thianchaichamnan@gmail.com | 093-1177457 | 230/12 Ladyao Chatuchak

PROFESSIONAL SUMMARY

Full-stack Web Developer specializing in Angular and .NET, building enterprise-grade systems for government and industrial clients such as Thai Oil. Experienced in designing scalable architecture and integrating complex systems (Azure AD, SAP, Oracle) to deliver reliable, user-focused solutions from requirement to production.

WORK EXPERIENCE

Software Developer 2024 – Present

- Developed and maintained enterprise-grade web applications for Thai Oil, one of Thailand's largest energy companies, supporting mission-critical safety, operations, and corporate travel functions
- Engineered e-PHA (Electronic Process Hazard Analysis), a platform for identifying and assessing operational risks and hazards across industrial production processes, strengthening safety compliance and decision-making
- Delivered RMIS (Risk Management Information System) to centralize risk tracking, reporting, and analytics, enabling data-driven organizational decision-making
- Designed and built a full-stack Car Service Management System for vehicle booking and dispatch — featuring driver/vehicle assignment, multi-level approvals, calendar scheduling, and automated reporting (Angular, .NET, Oracle, Azure AD SSO)
- Built TOP e-Biz, an enterprise travel & expense management platform covering the full trip lifecycle — requests, multi-level approvals, bookings, and reimbursements — integrated with SAP, Azure AD, and Exchange (Angular, .NET 8, Oracle)
- Architected system workflows, relational database schemas, and responsive user interfaces to ensure scalability and maintainability
- Collaborated with cross-functional stakeholders to translate business requirements into reliable, production-ready solutions

Web Developer 2023 – 2024

- Developed a student transportation management system deployed across Khon Kaen province to coordinate school commutes
- Designed and implemented the UX/UI for a Parkinson's disease screening system, focusing on accessibility and ease of use for patients and clinicians
- Built a satellite image management system integrated with GISTDA (Geo-Informatics and Space Technology Development Agency)
- Contributed to the development of Smart Farm and POS systems
- Collaborated with cross-functional teams to deliver scalable, user-friendly solutions

EDUCATION

Bachelor of Computer Science 2023

Maharakham University

- Developed a full-stack system to manage and track agricultural pest outbreaks, supporting real-time data collection and monitoring
- Integrated the Google Maps API to visualize outbreak locations and map the geographic spread of infestations
- Built cross-platform mobile and backend applications using Flutter, PHP, and MySQL
- Designed the data model and workflows around usability and efficient data management for practical agricultural use

SKILLS

- Languages: C#, TypeScript, JavaScript, PHP, Dart
- Frontend: Angular, Angular Material, RxJS, TailwindCSS
- Backend: .NET / ASP.NET Core, EF Core, Dapper
- Database: Oracle, SQL Server, PostgreSQL, MySQL
- Cloud: Azure AD (SSO), REST API
- DevOps: Docker, Git, VPS (Ubuntu, Windows Server), Remote Windows Server (RDP)
- AI Tools: Codex, Claude, Cursor, OpenRouter
